

I do not want the FCC to implement any proposal that would lessen the Indiana Telephone Privacy law protections. I work evenings and sometimes into the early mornings and do not appreciate my sleep being interrupted by unnecessary phone calls, which I was receiving up to 6 times daily before this law was implemented. My husband and I both have elderly mothers that have health problems and need to be available to them when needed. Thus the option of turning off the ringer during MY sleeping time IS NOT AN OPTION! PLEASE, PLEASE, PLEASE DO NOT LESSEN THE INDIANA TELEPHONE PRIVACY ACT!!!
